Project Details

Project 1 – CNC Plotter

Working as Team we made a Computerized Numerical Control Plotter.

Specifics:

It was Running on an Arduino Board, and was programmed to work on 2*2 inch sheet and it could draw images that were converted into GCODE.

Project 2 – Intelligent Dictionary

I made a Console input based dictionary which when provided input gives the meaning of that word.

Specifics:

It was programmed in python and other support files like the data for the dictionary was in JSON.

Executable file was made using PYPI.

Project 3 – Website Blocker

I made a website blocker using python which can run in background to block the listed websites in the working hours which can be changed by user in the code.

Specifics:

This program is based around a file named hosts located in the place of installation of windows.
